## Dip Powder | Step-By-Step Instructions

Follow hygiene procedures for tools and hands.

Prep the natural nail by removing the shine. Push back cuticles and remove any dead tissue. Remove dust with a lint-free wipe or nylon brush.

1.

2.

3.

Apply **BASE** leaving a margin of 3mm from the cuticle. **ALWAYS WIPE THE BRUSH BEFORE REPLACING.**

Dip the nail into either **CLEAR OR COLOURED POWDER** and tap off excess, or sprinkle over and remove excess with a brush.

Apply a second layer of **BASE** leaving a margin of 2mm from the cuticle **REPEAT STEP 2.**

Base

Activator

Finish

Brush Softener

Powder

### OPTIONAL

Apply a third layer of **BASE**, slightly closer to the cuticle without touching the skin. **REPEAT STEP 2.**

4.

5.

6.

Apply a generous amount of **ACTIVATOR** to each nail. Seal in the powder and cap the free edge. **LEAVE TO DRY FOR 2 MIN.**

Shape and smooth the sides, free edge and surface with a 240/180 grit file and a white block. Finish by using a sponge file. **REMOVE DUST.**

### Dipt™ TIPS

- Keep the neck of bottles free from product. Drain excess liquid from the brush on the inside of the bottle, not the outside.
- Always wipe brushes on a lint-free pad before replacing in the bottle.
- If the brush becomes hard, swap it for the brush in the brush softener. Wipe and dry the brush before using. Clean any product from the hard brush before putting into the brush softener.
- Graduating the application of the product, keeping it thin at the cuticle and keeping product off the skin, will stop lifting.
- Shake or stir the powder before each use for a smooth application.
- The first coat of Finish should be applied thin and fast.
- Always make sure the Activator has had time to dry before applying the Finish.
- Apply a layer of clear powder first when using neons and high pigment colours.
- Simply soak off by filing 40% of the product, place an acetone soaked cotton pad onto the nail, wrap and secure with foil for 15 mins.

7.

8.

Apply a second coat of **ACTIVATOR** as before. **LEAVE TO DRY FOR 2 MIN.** Wipe over the nails with a lint-free wipe to remove any trace of **ACTIVATOR** before applying **FINISH.**

Apply a thin layer of **FINISH** to each nail using quick, light strokes. This application does not need to be accurate. **WAIT 15 SECS.**

Apply a second layer of **FINISH**, this time slower with an accurate coverage, capping the free edge. Do not over-brush as this may reduce the finished shine. **LEAVE TO DRY FOR 2 MIN.**

9.

Done & Enjoy!
